

Rahu Ketu transit May 2025 to December 2026

Rahu Ketu is the name given to the Nodes of the Moon. Rahu is Northern Node and Ketu is Southern Node. They are known as Chayya Graha's (shadow planets). They have no substance and are physically non-existent. Yet their influence is full of potency and spiritual significance. They work 180 degrees apart, two opposite points in the zodiac with a mission to churn our lives to externalize hidden potential and wisdom. In keeping with their shadow nature, they work on a psychological level. It is always difficult to gauge their effect because their main concern is with our emotional makeup. They affect us internally. We are unaware of what exactly is happening to us at the time.

Ketu deals with the past Karma and Rahu with the future.

The five instincts that keep us attached to the materialistic purpose of life are Desire, Anger intoxicants, attachment, greed and Jealousy. We need to control our instincts rather than allowing ourselves to be controlled by them. Both Rahu and Ketu can keep our mind focused on these instincts- Rahu by exaggerating and Ketu by obscuring or blocking. We are tied down to the cycle of unhappiness and dissatisfaction as we cannot break away from our lower selves. We are born again and again to experience the pleasures and pains of the earthly life until we recognize them to be the illusions that they are. On a subconscious level we are afraid that if we give up these desires, we will lose out. Once we start understanding the principle of letting go, enjoying what life has to offer but not getting attached, then we are able to grow spiritually.
